Election/Restrictions

Claims 1-5,13,49,50,54-60,62-69,91,93,94,97-104,106-112 and 114-130 are allowable. The restriction requirement between Species I-VI and sub-species a-d, as set forth in the Office action mailed on 9/12/05, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 56, 64-68, 93, 94, 97, 98, and 100, directed to Species I-III, V, VI and sub-species a-d no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claim 61, directed to an unrelated invention has been cancelled.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bradley Jensen on 8/30/07.

The application has been amended as follows:

IN THE CLAIMS:

Claim 61 has been cancelled.

Claim 106. In line 1, "105" has been amended to --101--.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose a sleeve element comprising an annular body wherein the first end region is configured to be biased laterally in a first direction into at least one recess, at least one sealing feature configured to be biased laterally into a laterally adjacent recess, a second sealing feature, configured to be biased laterally into the second recess; and at least one depression formed in at least one of the outer surface and the inner surface, wherein the at least one depression includes a first depression and a second depression. The closest prior art, Kawai et al. (US Patent No. 5,050,892), fails to disclose the at least one depression including a first and a second depression and there is no motivation, absent the applicant's own disclosure, to modify the Kawai et al. reference in the manner required by the claims.
